Make Before You Break, Talk Before You Block

- You must coordinate with HCC BEFORE you block a walk path, road, or stair.
- We need to have the opportunity to communicate that accesses are changing.
- It is important to give people time to plan alternate ways to access their work and plan emergency evacuation routes.
- We also need to have another path established prior to removing, blocking, or otherwise impeding access to areas.
- Please make sure your crews understand this so that they don't close something without properly planning for it and giving you the chance to communicate with HCC.
